Flea Treatment Preparation Sheet

Fleas are very difficult to eradicate without your help! We have developed a special checklist for our customers to complete during and after the treatment process. We ask that you please review this worksheet and complete all items listed. When this checklist is followed we have discovered that not only are our treatments faster and more effective, but it also costs our customers less time and money in the long run.

Thank you for choosing Perseverance Pest Control. If you have any questions please don't hesitate to contact our office at (317) 288-3315.

Items That Must Be Completed Prior To Our Arrival:

- Be prepared to vacate your home during service and for 4 hours following service to allow time for chemicals to dry. Please consult with your P.P.C. Specialist at the time of service so that you may give him proper instruction on how you would like your home or establishment locked and secured after treatment is complete. Do not enter or allow children or pets to enter the treated structure for at least 4 hours unless specified otherwise.
- Clear all carpeted floors – including closets – of boxes, clothing and any other items that will prevent treatment. Place dishes, silverware, pet food dishes and children's toys that might be exposed in a protected area or simply cover them with a sheet or large piece of plastic
- Wash (in hot water) or destroy all pet bedding. If bedding is put into trash, put into sealable plastic bag and dispose of into an exterior trash bag.
- Mop wood, tile and vinyl floors.
- Vacuum all carpeting and rugs thoroughly. Carefully vacuum pet sleeping and resting areas - under furniture, cracks and crevices in floors and draperies. Vacuum furniture - especially between and under cushions. Empty the contents of the vacuum cleaner into a plastic bag. Immediately dispose of the bag in an outside container.
- Remove all pets and birds, also shut off air in fish tanks, and cover. Store or cover all pet food containers and bowls. Note: aquatic life and birds are particularly sensitive to product and/or chemicals. Birds must be removed from home or establishment for at least 24 hours.
- Have dogs, cats and other flea-infested pets professionally treated by your local veterinary clinic at the same time the home is treated.

After Treatment Is Complete:

- Do not enter for a full 4 hours after the treatment is completed. Immediately upon entering the treated structure after the treatment, open all windows and doors and air out thoroughly.
- DO NOT clean carpets or floors with detergents or cleaners for at least one month after treatment is complete.

PERSEVERANCE PEST CONTROL

We Keep Working...

- ❑ Continue to vacuum daily for two weeks. Be sure to dispose of the bag after each vacuuming (in an exterior trash bin).
- ❑ Please wait 21 days for the full effect of the treatment. If after 21 days there is still activity, call for a re-treatment before the 30 days expires. In severe infestations, we may require one or more follow-up visits.

Please, be prepared and ready when the technician arrives. And please be prepared to be GONE FROM YOUR HOME FOR A MINIMUM OF 4(FOUR)HOURS OR UNTIL CHEMICAL IS COMPLETELY DRY. Please make sure ALL PETS, PEOPLE WITH BREATHING ISSUES, AND CHILDREN DO NOT RE-ENTER BEFORE ANOTHER PERSON MAKES SURE IT IS DRY AND FREE OF ODORS.
